

Text UI

- Main menu
- Route choice
- item menu
- Store menu

Store

- store(name)
- get_name
- Items
- Cart items
- Add item to cart
- remove item from cart
- display cart
- checkout
- clear cart
- display inventory

Item

- Item(id, type, cost, quantity)
- get_id
- get_quantity
- get_cost
- get_type
- Increase quantity
- decrease quantity
- toString
- Clone

Shopping Cart

- add item
- remove item
- display cart
- clear cart
- get_items
- Shopping cart

Clone() returns a new item with old values. It is in here so it can pass information on when an item is moved into the cart.
